

Personal biometric access control

Personal access problems can be solved using the E Key finger scanning unit.

Keys, passwords, swipe cards, proximity tags, PINs, etc can no longer be forgotten or lost.

Up to 99 individuals can be programmed into each unit.

Children have no need to carry keys

No Keys can be reproduced or copied

New users need no keys

Guests need no keys

Any authorised users can be easily deleted from the system

To operate just swipe a finger over the scanner, in 1.2 seconds the door will get the command to unlock.

This provides the highest possible degree of access protection for your home, office, apartment, safe areas, etc.
