

# Motorised Water stop cock

**WaterSafe, a remote water mains switch with remote water leak detectors. Designed to allow the mains water into a property to be easily turned off and on, at the simple flick of a switch. Remote or wired leak detectors can also be placed in areas that may flood, automatically cutting off the mains water, protecting property and preventing flood damage.**

# WaterSafe

**Turn your mains water on and off at the flick of a switch.**

**Automatically turns the water off, if a leak is detected.**
